

To Whom it may Concern:I write with regard to the NAB Petition #04-160. I have been a subscriber to XM Satellite radio for slightly over a year. I travel several hundred miles per weekend through remote areas of Nevada where there is absolutely no radio signal whatsoever. I have come to rely upon XM Satellite Radio for the choice offered in music and traffic, but most importantly - weather & news. Since I have the flexibility to carry the receiver from my vehicle into my living quarters horse trailer, I always have service available. As a consumer, I am willing to pay the nominal fee for service and enjoy not be bombarded with solicitations. I freely choose to subscribe and get to choose what to listen to. I would request that you consider the desires of the subscriber as you consider your choice in whether to support or not to support the aforementioned petition. Thank you in advance.
